

Expansion Joints

Advanced Sealing and Supply Company is your one-stop source for rubber, metal and fabric (composite) expansion joints for all of your plant requirements.

With over 125 years of combined experience in:

- Analysis
- Design
- Engineering
- Manufacturing
- Installation
- Repair

Complete “Turn-Key” Systems We’ll see your project all the way from conception to completion. We specialize in the design, manufacture and installation of complete expansion joint systems - including supporting framework. Our alliances with approved construction and maintenance companies assure you of quality work that is completed safely, on time and within budget.

Lifetime Support We’ll support you for the life of your joint. Our factory-trained personnel can splice or repair composite (fabric) and rubber expansion joints on site. We also carry a full selection of spare parts, splice films and vulcanizing equipment. Our full line of fasteners (including Teflon coated bolts for salt air corrosive systems) and complete gasket capabilities will assure you of a tight, leak free seal that will enhance production, increase reliability and improve worker safety.

Representing Holz Rubber, RM/Dynex, JM Clipper, Proco, MicroFlex and Badger Industries.
