## Advance Sealing Spiral Wound Gasket

### Style S

Winding only - No Inner or Outer Rings

Advanced Sealing's **Style S** Spiral Wound gasket is a "winding only" product that is designed for use in all applications that utilize a machined groove for gasket containment. This includes valve bonnets, tongue-and-groove flanges, and other special applications.

Standard Metallurgy<sup>(1)</sup>

304SS or 316L SS

Standard Filler<sup>(2)</sup>

Flexible Graphite

#### Notes:

1. Other metals can be specified to meet the demands of your application. Available metals include 321 SS, 347 SS, Alloy 20, Hastelloy, Inconel, Monel, Nickel and Titanium.
2. Other filler materials include PTFE, Ceramic, and Mica Graphite.
